Question No. 1

A company uses Dynamics 365 Supply Chain Management.

The company is consistently short on inventory for a group of produced finished good items. This creates

customer service issues.

You need to ensure that production orders are automatically created when inventory is low.

Which two actions should you perform? Each answer represents a partial solution.

NOTE: Each correct selection is worth one point.

- **A.** Update the item maximum.
- **B.** Update the item minimum.
- **C.** Set Capable to Promise.
- **D.** Create a safety stock journal.
- **E.** Create a transfer journal.

Answer: B, D

Question No. 2

A company uses planning optimization in Dynamics 365 Supply Chain Management. Automatic firming is

enabled. Some of the planned purchase orders are not being firming as expected. The inventory planners therefore need

to manually process planned purchase orders.

You need to include the planned purchase orders in automatic firming.

What are two possible configurations you can use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- **A.** Lead Time
- **B.** Automatic firming time fence (days)
- **C.** Requirements Date
- **D.** Freeze time fence on master plan

Answer: A, B

Question No. 3

A warehouse picks and ships product.

The warehouse completes work immediately upon automatic release to the warehouse.

You need to configure waves to allow for automatic work creation.

What should you do?

- **A.** Select the wave template and attribute to automatically process.
- **B.** Release to warehouse and process the work.
- **C.** Automate wave creation and process the wave at release to warehouse.
- **D.** Automate wave creation and automatically process work.

Answer: C

Question No. 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses Dynamics 365 Supply Chain Management to manage inventory.

Backorders exist on customer sales orders because incorrect data was given on product quantities.

Users need to look up what quantity can be sold and when more product will arrive.

Solution: Ordered shows what quantities are on inbound orders to the warehouse.

Does the solution meet the goal?

- **A.** Yes
- **B.** No

Answer: A

Question No. 5

A company uses Dynamics 365 Supply Chain Management.

Orders are reserved against open purchase orders that have not yet been received. As a result, there are

issues prioritizing deliveries, which is causing backorders on both sales orders and transfer orders.

Negative inventory is not currently allowed.

Product reservations must be performed against physical stock only.

You need to update the configuration for product reservations.

What should you do?

- **A.** Clear the Reserve Items Automatically check box for transfers.
- **B.** Clear the Reserve Ordered Items check box.
- **C.** Select the Auto batch reservations check box.
- **D.** Select the Physical negative inventory check box.

Answer: B
