

# Get Desired Result In CompTIA Exam By Using CS0-002 Dumps Pdf

When graduates join office they are usually thinking mainly about the joy of life but soon they discover that they have to start thinking about their future and success in the CompTIA Cybersecurity Analyst (CySA+). For many individuals, this period is hard because they are not quite ready to take a step forward to a grown-up life and accept the responsibilities to take care of themselves. Many employees do not realize that preparing for the CompTIA Cybersecurity Analyst certification is for their own good and for their own future that is why they lack the motivation and improper knowledge needed for successful preparation. Because a student does not quite realize why CompTIA Cybersecurity Analyst (CySA+) Exam is so important he/she may feel under tremendous pressure and discomfort while studying which may result in high levels of stress. That is why it is important to know how to reduce the stress of CompTIA CS0-002 exam with [CS0-002 Dumps Pdf](#).

First of all, you have to choose the proper knowledge for your goals. That includes going on to the desired platform and having the good opportunity to acquire the much-needed knowledge. Of course, some would say that it is impossible for all candidates to attend the most prominent platforms because not all can pay for them. Well, this can be set aside because going to famous CS0-002 Exam preparation platforms will not reduce the levels of a candidate's stress.

### Question No. 1

An incident response team is responding to a breach of multiple systems that contain PII and PHI. Disclosing the incident to external entities should be based on:

- A. the responder's discretion
- B. the public relations policy
- C. the communication plan
- D. senior management's guidance

**Answer: A**

### Question No. 2

A cybersecurity analyst has access to several threat feeds and wants to organize them while simultaneously comparing intelligence against network traffic.

Which of the following would BEST accomplish this goal?

- A. Continuous integration and deployment
- B. Automation and orchestration
- C. Static and dynamic analysis
- D. Information sharing and analysis

**Answer: B**

### Question No. 3

An analyst wants to identify hosts that are connecting to the external FTP servers and what, if any, passwords are being used. Which of the following commands should the analyst use?

- A. `tcpdump --X dst port 21`
- B. `ftp ftp.server --p 21`
- C. `nmap --o ftp.server --p 21`
- D. `telnet ftp.server 21`

**Answer: A**

### Question No. 4

A critical server was compromised by malware, and all functionality was lost. Backups of this server were taken; however, management believes a logic bomb may have been injected by a rootkit. Which of the following should a security analyst perform to restore functionality quickly?

- A. Work backward, restoring each backup until the server is clean
- B. Restore the previous backup and scan with a live boot anti-malware scanner
- C. Stand up a new server and restore critical data from backups
- D. Offload the critical data to a new server and continue operations

**Answer: C**

### Question No. 5

A security analyst has received information from a third-party intelligence-sharing resource that

indicates employee accounts were breached.

Which of the following is the NEXT step the analyst should take to address the issue?

- **A.** Audit access permissions for all employees to ensure least privilege.
- **B.** Force a password reset for the impacted employees and revoke any tokens.
- **C.** Configure SSO to prevent passwords from going outside the local network.
- **D.** Set up privileged access management to ensure auditing is enabled.

**Answer:** B
