

# Get Desired Result In Microsoft Exam By Using AZ-500 Dumps Pdf

When graduates join office they are usually thinking mainly about the joy of life but soon they discover that they have to start thinking about their future and success in the Microsoft Azure Security Technologies. For many individuals, this period is hard because they are not quite ready to take a step forward to a grown-up life and accept the responsibilities to take care of themselves. Many employees do not realize that preparing for the Azure Security Engineer Associate certification is for their own good and for their own future that is why they lack the motivation and improper knowledge needed for successful preparation. Because a student does not quite realize why Microsoft Azure Security Technologies Exam is so important he/she may feel under tremendous pressure and discomfort while studying which may result in high levels of stress. That is why it is important to know how to reduce the stress of Microsoft AZ-500 exam with [AZ-500 Dumps Pdf](#).

First of all, you have to choose the proper knowledge for your goals. That includes going on to the desired platform and having the good opportunity to acquire the much-needed knowledge. Of course, some would say that it is impossible for all candidates to attend the most prominent platforms because not all can pay for them. Well, this can be set aside because going to famous AZ-500 Exam preparation platforms will not reduce the levels of a candidate's stress.

The advertisement features a circular inset image on the left showing three students (two men and one woman) wearing face masks and studying together outdoors on a grassy area. The background of the ad is white with blue and pink diagonal accents. The text is prominently displayed on the right side.

### Question No. 1

You need to ensure that the rg1lod10598168n1 Azure Storage account is encrypted by using a key stored in the KeyVault10598168 Azure key vault.

To complete this task, sign in to the Azure portal.

- **A.** Explanation: Step 1: To enable customer-managed keys in the Azure portal, follow these steps: 1. Navigate to your storage account rg1lod10598168n1 2. On the Settings blade for the storage account, click Encryption. Select the Use your own key option, as shown in the following figure.

Step 2: Specify a key from a key vault To specify a key from a key vault, first make sure that you have a key vault that contains a key. To specify a key from a key vault, follow these steps: 4. Choose the Select from Key Vault option. 5. Choose the key vault KeyVault10598168 containing the key you want to use. 6. Choose the key from the key vault.

**Answer: A**

### Question No. 2

You have an Azure subscription that contains an Azure SQL database named sql1.

You plan to audit sql1.

You need to configure the audit log destination. The solution must meet the following requirements:

Support querying events by using the Kusto query language.

Minimize administrative effort.

What should you configure?

- **A.** an event hub
- **B.** a storage account
- **C.** a Log Analytics workspace

**Answer: C**

### Question No. 3

You have an Azure Active Directory (Azure AD) tenant named contoso.com

You need to configure diagnostic settings for contoso.com. The solution must meet the following requirements:

\* Retain logs for two years.

\* Query logs by using the Kusto query language

\* Minimize administrative effort.

Where should you store the logs?

- **A.** an Azure Log Analytics workspace
- **B.** an Azure event hub
- **C.** an Azure Storage account

<https://docs.microsoft.com/en-us/azure/azure-monitor/log-query/get-started-queries>

**Answer: A**

#### Question No. 4

You have a web app hosted on an on-premises server that is accessed by using a URL of <https://www.contoso.com>. You plan to migrate the web app to Azure. You will continue to use <https://wvAV.contoso.com>. You need to enable HTTPS for the Azure web app. What should you do first?

- **A.** Export the public key from the on-premises server and save the key as a P7b file.
  - **B.** Export the private key from the on-premises server and save the key as a PFX file that is encrypted by using TripleDES.
  - **C.** Export the public key from the on-premises server and save the key as a CER file.
  - **D.** Export the private key from the on-premises server and save the key as a PFX file that is encrypted by using AES256.
- <https://docs.microsoft.com/en-us/azure/app-service/configure-ssl-certificate#private-certificate-requirements>

**Answer: B**

#### Question No. 5

You have an Azure subscription that contains the resources shown in the following table.

Name	Type
VM1	Virtual machine
VNET1	Virtual network
storage1	Storage account
Vault1	Key vault

You plan to enable Azure Defender for the subscription.

Which resources can be protected by using Azure Defender?

- **A.** VM1, VNET1, storage1, and Vault1
- **B.** VM1, VNET1, and storage1 only
- **C.** VM1, storage1, and Vault1 only
- **D.** VM1 and VNET1 only
- **E.** VM1 and storage1 only

**Answer: A**
