Question No. 1

Universal Containers (UC) currently owns a middleware tool and they have developed an API-led integration architecture with three API tiers. The first tier interfaces directly with the systems of engagement, the second tier implements business logic and aggregates data, while the third tier interfaces directly with systems of record. Some of the systems of engagement will be a mobile application, a web application, and Salesforce.

UC has a business requirement to return data to the systems of engagement in different formats while also enforcing different security protocols.

What should an Integration Architect recommend to meet these requirements?

- **A.** Enforce separate security protocols and return formats at the first tier of the API-led architecture.
- **B.** Implement an API gateway that all systems of engagement must interface with first.
- **C.** Enforce separate security protocols and return formats at the second tier of the API-led architecture.
- **D.** Leverage an Identity Provider solution that communicates with the API tiers via SAML

Answer: B

Question No. 2

A global financial company sells financial products and services that include the following:

1. Bank Accounts

2. Loans

3. Insurance

The company has a core banking system that is state of the art and is the master system to store

financial transactions, financial products and customer information. The core banking system

currently processes 10M financial transactions per day. The CTO for the company is considering

building a community port so that customers can review their bank account details, update their

information and review their account financial transactions.

What should an integration architect recommend as a solution to enable customer community

users to view their financial transactions?

A Use Salesforce Connect to display the financial transactions as an external object.

- **C.** Use Salesforce Connect to display the financial transactions as an external object.C Use Salesforce External Service to display financial transactions in a community lightning page. D Use Iframe to display core banking financial transactions data in the customer community.

Answer: C

Question No. 3

Universal containers is planning to implement Salesforce as their CRM system. Currently

they have the following systems

1. Leads are managed in a Marketing System.

2. Sales people use Microsoft Outlook to enter contacts, emails and manage activities.

3. Inventory, Billing and Payments are managed in their ERP system. 4. The proposed CRM

system is expected to provide Sales and Support people the ability to have a single view of their

customers and manage their contacts, emails and activities in Salesforce CRM.

What should an Integration Consultant consider to support the proposed CRM system strategy?

- **A.** Plan for migration of customer and sales data across systems on a regular basis to keep them in sync.
- **B.** Evaluate current and future data and system usage and then identify potential integration requirements to Salesforce.
- **C.** Explore Out of box Salesforce connectors for integration with ERP, Marketing and Microsoft Outlook systems.
- **D.** Propose a middleware system that can support interface between systems with Salesforce.

Answer: B

Question No. 4

Northern Trail Outfitters is in the final stages of merging two Salesforce orgs but needs to keep the retiring org available for a short period of time for lead management as it is connected to multiple public web site forms. The sales department has requested that new leads are available in the new Salesforce instan within 30 minutes.

Which two approaches will require the least amount of development effort?

Choose 2 answers

- **A.** Configure named credentials in the source org.
- **B.** Use the Composite REST API to aggregate multiple leads in a single call.
- **C.** Use the tooling API with Process Builder to insert leads in real time.
- **D.** Call the Salesforce REST API to insert the lead into the target system.

Answer: A, B

Question No. 5

A Salesforce customer is planning to roll out Salesforce for all their Sales and Service staff.

Senior Management has requested that monitoring is to be in pla for Operations to notify any

degradation in Salesforce performance.

How should an integration consultant implement monitoring?

- **A.** Use Salesforce limits API to capture current API usage and configure alerts for monitoring.

- **B.** Use APIEVENT to track all user initiated API calls through SOAP, REST or BULK APIs.
- **C.** Identify critical business processes and establish automation to monitor performance against established benchmarks.
- **D.** Request Salesforce to monitor the Salesforce instance and notify when there is degradation in performance.

Answer: C
