Question No. 1

Universal Containers (UC) service reps are assigned to a profile which has "View All" in Case

object (Private OWD). To make sure service reps have access to all relevant information to

attend to customer requests, which two details should a salesforce Architects consider?

Choose 2 answers:

- **A.** Service reps will be able to access all UC contact records if they are controlled by parent.
- **B.** Service reps will not be able to access all UC contact records if they are controlled by parent.
- **C.** Service reps will be able to access all the UC Account records due to Implicit Sharing.
- **D.** Service reps will not be able to access all the UC Accounts records because Account OWD is private. How can an architect achieve this https://developer.salesforce.com/docs/atlas.en-us.apexcode.meta/apexcode/apex_classes_per ms_enforcing.htm Example: To check the field-level read permission of the contact's email field before querying for this field: if (Schema.sObjectType.Contact.fields.Email.isAccessible()) { Contact c = [SELECT Email FROM Contact WHERE Id= :Id]; } Answer for B - https://developer.salesforce.com/docs/atlas.en-us.apexcode.meta/apexcode/apex_classes_key words_sharing.htm The "with sharing" keyword allows you to specify that the sharing rules for the current user are considered for the class. You have to explicitly set this keyword for the class because Apex code runs in system context. In system context, Apex code has access to all objects and fields--- object permissions, field-level security, sharing rules aren't applied for the current user. This strategy ensures that code doesn't fail to run because of hidden fields or objects for a user.

Answer: B, D

Question No. 2

Besides their own team accounts, sales managers at Universal Containers need to have

READ access to all accounts of the same segment in other countries. Role hierarchy was

implemented accordingly (based on countries), but a sales manager in the US is complaining

that he cannot view account records of the same segment in Canad

What should be done

to grant access in a proper way?

- **A.** Create an owner-based sharing rule to grant access to account records that have the same segment to all sales manager roles.
- **B.** Change the role hierarchy and put all of the sales managers in the US and Canada in the same role.
- **C.** Create criteria-based sharing rules to grant access to account records that have the same segment to all sales manager roles.
- **D.** Create a public group and include all accounts of the same segment and grant access through a permission set.
- **E.** Owner-Based Sharing Rules An owner-based sharing rule opens access to records owned by

certain users. For example, a company's sales managers need to see opportunities owned by sales managers in a different region. The U.S. sales manager could give the APAC sales manager access to the opportunities owned by the U.S. team using owner-based sharing. https://help.salesforce.com/articleView?id=security_sharing_rule_types.htm&type=5

Answer: A

Question No. 3

What is the security vulnerability in the following code snippet?   Value of my Textfield is

- **A.** SOQL Injection
- **B.** Arbitrary Redirects
- **C.** Cross-Site Scripting
- **D.** Access Control

Answer: C

Question No. 4

Universal Containers has two custom objects: Job and Job Interview. The Job Interview object has a lookup relationship to Job. Both objects are set to Private in sharing settings. The HR team will own all Job and Job Interview records. They have asked their Salesforce Architect to automatically share the Job Interview when the Interviewer (lookup to user record) has been populated. The interviewer can be from any department. What method should the Architect use to achieve this requirement?

- **A.** Build apex Managed Sharing code to share Job Interview with the Interviewer user
- **B.** Build a criteria-based sharing rule between the Job Interview and the Interviewer
- **C.** Build a standard sharing rule between Job Interview and the Interviewer
- **D.** Build a workflow email notification to notify the interviewer of the record assignment

Answer: A

Question No. 5

A Sales Rep at Universal Containers wants to create a dashboard to see how his sales numbers compare with his peers. Assuming a Private model, which two permissions would the Sales Rep need to meet this requirement?

- **A.** Manage Custom Report Types
- **B.** Customize Application
- **C.** Manage Dashboards
- **D.** View All Data

Answer: C, D
